

# Indoor Air Quality (IAQ) Cluster Meeting

Research on energy saving and indoor  
climate improvement.

Jugend- und Kulturzentrum Mon Ami, Weimar  
as part of the LEHM 2016  
Sunday 13.11.16, 14.30 -16.00 pm

The ECO-SEE and H-House research projects both aim to address emerging problems associated with modern airtight, low energy buildings through the development of vapour active eco-materials. Research on clay-based materials from both projects will be presented to the participants of the meeting, followed by an open discussion on current experience and future research needs.

Participation is free for all interested parties /  
Teilnahme für alle Interessierten kostenfrei.
